

DARBEEVISION INC.

DVP – 5000S Quick Start Guide

You will need the AC power adapter (provided), 2 HDMI cables (1 provided), an HDMI video display (TV, monitor, projector, etc.), and an HDMI video source (Blu-ray or DVD player, videogame console, cable or satellite box, computer, smart phone, etc.).

1. Plug one end of an HDMI cable into the video source's HDMI Output and the other end into the DVP-5000S **HDMI In**.
2. Plug one end of another HDMI cable into the DVP-5000S **HDMI Out** and the other end into the display's HDMI Input.
3. Plug the AC power adapter into a 100-240 VAC power outlet and plug the **5V DC** plug into the DVP-5000S **power input jack**.
4. When the device is powered, a green and red internal LED will illuminate. When video is present, the blue LED will illuminate. Go into the onscreen menu for more help and many options.
5. Watch your favorite movies, video games and TV with a new level of depth, clarity and realism.

EASY SETUP DIRECTIONS

1

VIDEO SOURCE

Connect the DVP-5000S HDMI Output to your TV HDMI Input.

Connect HDMI Video Source to the HDMI Input on the DVP-5000S.

2

Connect the 5V Power Adapter to the DVP-5000S, and to the power source.

Turn ON the power for the video source and TV.

3

SYSTEM LED INDICATORS:

- Red LED is On when power is present
- Blue LED is On when HDMI video is present
- Green LED is On when system is active

Hints:

- Toggle DARBEE On/Off to see the image benefit
